VishTek Group – UAE | Salesforce CRM Implementation & Sales Operations

Developed and implemented a Salesforce environment for VishTek Group, including custom objects, automation, security configuration, and quotation/invoice PDF generation. Led ongoing system enhancements, user management, CRM support, and sales process optimization.

Key Responsibilities:

Salesforce & Sales Operations / Project Coordination

- Set up and configured Salesforce environments, including organization-wide settings, security policies, user management, Profiles, Roles, Permission Sets, and access controls.
- Created and customized Salesforce objects, fields, relationships, page layouts, and Lightning Record Pages to support sales, invoicing, procurement, and operational processes.
- Developed Salesforce Flows and automation for lead assignment, follow-up notifications, approval processes, quotation workflows, and quote lifecycle management.
- Designed reusable HTML and Salesforce email templates for quotations, customer follow-ups, order confirmations, invoices, and other business communications.
- Developed quotation and invoice PDF generation using Salesforce Apex/Visualforce and automated document workflows.
- Managed client inquiries, technical clarifications, requirement gathering, and scope understanding, translating business requirements into CRM and operational solutions.
- Prepared and processed **quotations, purchase orders, order confirmations, invoices**, and related commercial documentation.
- Coordinated with suppliers to obtain pricing, technical specifications, product availability, and delivery lead times.
- Followed up on material procurement, delivery schedules, dispatch status, and order fulfillment to ensure timely project execution.
- Coordinated with clients, suppliers, sales teams, and internal departments to align material requirements, project schedules, and site execution activities.
- Maintained accurate records of customer inquiries, quotations, orders, procurement activities, deliveries, and communications using Salesforce and other business systems.
- Supported project execution by coordinating commercial and technical requirements and resolving client, supplier, and internal coordination issues.
- Conducted user training, provided post-deployment Salesforce support, and assisted users with CRM workflows, data management, and system-related issues.
- Continuously improved CRM and sales processes through Salesforce customization, automation, reporting, and process optimization.

Qualex Consulting Pvt Ltd. - Salesforce Administrator / Developer

Salesforce Loyalty Management (VB Loyalty Management Project)

- Implemented and managed a comprehensive loyalty and rewards program to enhance customer engagement and retention.

- Designed and executed processes such as Auction Process and Point Conversion system tailored to user tier groups.
- Developed multi-select lookup flow components, custom Flows, Apex classes, triggers, and formula fields to meet dynamic business requirements.
- Integrated external applications with Salesforce through Connected Apps and API-based solutions, utilizing Change Data Capture and Platform Events.
- Designed and implemented event relays for seamless data communication.
- Created formula fields to copy related data from one object to another based on selected lookup fields.
- Implemented validation rules to restrict field modifications during critical live auction periods.
- Conducted user training sessions and provided ongoing support to ensure seamless adoption of the loyalty program by internal teams.
- Regularly monitored program performance and leveraged Salesforce analytics for data-driven strategies to improve customer engagement.
- Configured and maintained the Breadwinner Salesforce NetSuite connector, enabling sales teams to access live financial data (invoices, payments) within Salesforce.
- Designed and executed end-to-end integration flows between Salesforce Sales Cloud and NetSuite ERP using MuleSoft Composer, enabling near real-time syncing of accounts, customers, opportunities, and sales orders.

HR Management System

- Automated HR processes by designing custom objects, workflows, and validation rules to improve efficiency.
- Engineered Visualforce pages for document generation and integrated custom Apex solutions for streamlined data management.
- Designed and deployed reports and dashboards to provide actionable insights to HR stakeholders and management, supporting data-driven decision-making.
- Developed and implemented custom buttons with Apex to allow direct upload of images and documents from PCs to record pages.

Core Salesforce Administration and Support

- Managed user profiles, roles, and permissions to ensure secure and efficient platform utilization.
- Configured workflow rules, approval processes, and automated solutions to reduce manual tasks and increase process consistency.
- Designed and implemented automation processes such as approval workflows and time-triggered tasks.
- Executed data migration and updates using tools like Data Loader, ensuring seamless transitions and accuracy.
- Designed and customized Salesforce components such as objects, tabs, record types, and page layouts to meet organizational requirements.
- Provided ongoing support for Salesforce configuration, administration, reporting, and troubleshooting.
- Created and maintained comprehensive documentation for profiles, permissions, and data mapping to streamline system management.
- Developed auto-response rules and case management solutions to improve customer inquiry handling.

Fanar Al Khaleej Refrigeration Company – Project Engineer UAE & GCC

Managed and supervised site execution, installation, coordination, and project delivery for industrial refrigeration plants, cold storage facilities, HVAC systems, and steam plants across multiple GCC projects. Coordinated with clients, consultants, subcontractors, suppliers, and internal teams to ensure projects were executed according to approved drawings, specifications, schedules, quality requirements, and HSE standards.

Key Responsibilities:

- Supervised installation and execution of Ammonia and Freon refrigeration systems for industrial and commercial applications.

- Managed cold storage installations including freezers, chillers, and dry stores.
- Coordinated installation and execution of HVAC chilled water systems.
- Supervised refrigeration piping, insulation, equipment erection, and related mechanical works.
- Coordinated with consultants, clients, subcontractors, suppliers, and site teams to resolve technical and execution requirements.
- Reviewed project drawings, specifications, material requirements, and installation activities to ensure compliance with project standards.
- Monitored project progress, manpower, material availability, and site activities to support on-time project completion.
- Coordinated material requirements, procurement follow-up, delivery schedules, and material tracking for project execution.
- Ensured compliance with HSE requirements, approved drawings, specifications, and site procedures.
- Supported testing, commissioning, troubleshooting, and project handover activities.
- Prepared and maintained site documentation, progress reports, material tracking records, and project-related documentation.
- Assisted in resolving technical, commercial, and coordination issues during project execution.
